

SAP Lumira Discovery Basic and Advanced Custom BI Training

1-2
DAYS

We deliver comprehensive custom on-site training to empower business users, led by our real experts. Explore how SAP Lumira Discovery helps your organization simplify your data to create interactive visualizations and stories with self-service BI. Make sense of your data and get hands-on training on how to:

- Connect and prepare data with multiple data sources such as Excel, SAP HANA, BW, Universe, and more
- Create interactive charts, maps, and infographics
- Deliver insights with agile, intuitive data visualizations
- Explore the capabilities for data-discovery and self-service
- Securely and easily share stories with other users

This custom training includes instructor-led, hands-on exercises in creating dashboards and reports. We use demo data specifically designed to provide exposure to a range of realistic scenarios.

ABSTRACT

Group and Analyze your Data

Save Time with Global Filters
